

EXCALIBUR

Alertline™, the industry's first PVC pipe compounded and color coded exclusively to carry reclaimed water, virtually eliminates the problem of dangerous cross connections. Combining simplicity and innovation, Alertline's unique purple color instantly signals everyone of a reclaimed water line. With Alertline, there is no caution tape to fall off and no language barrier to overcome. And, Alertline is available with features to meet nearly any specification.

Manufactured by Excalibur Extrusions, Inc., Alertline is the result of years of experience in specialty PVC products. It was developed by people who understand the complexities and potential hazards involved with the increased use of reclaimed water and the importance of maintaining the quality of the nation's potable water supply. Alertline is a timely solution to a vitally important problem.

Available in Classes 200, 315 and Schedule 40 (other classes and schedules upon request), Alertline comes in a variety of sizes with plain or belled ends. Alertline's bell end or plain end pipe is available in 1/2" through 6" sizes.

Code Standards

Alertline pipe meets or exceeds all International Association of Plumbing and Mechanical Officials (IAPMO) and National Sanitation Foundation (NSF) standards for PVC Type 1, Grade 1 pipe. It is designed to be installed underground and to be used exclusively with reclaimed water.

Saves Worry, Time and Money

Ensuring the safety of the potable water supply is a demanding job. With the increased use of reclaimed water in today's water management programs, the focus of this task is even greater. Alertline offers water agencies, specifiers, architects and inspectors that extra measure of safety. Alertline eliminates the risk of cross connection in an area where there is no margin for error. Additionally, Alertline speeds installation and reduces maintenance time. With Alertline, there is never a doubt which pipe carries reclaimed water.

For Sizes and Part Numbers, see reverse.
